Peli™ 1726 Air Case

Lighter. Certified Tough. Logistics-Optimised.

The Peli 1726 Air Case provides protection for multiple weapons systems, survey equipment and professional gear transport. The 1726 Air delivers weight-saving construction while maintaining the same trusted dimensions. Available with pick and pluck foam or case only, the Peli 1726 Air Case will lighten the load while protecting your mission-critical equipment.

Features

1. **Premium HPX[A] Construction:** Up to 40% lighter than equivalent cases, delivering uncompromising strength and impact resistance without the fatigue.
2. **Certified Toughness:** IP67-rated and rigorously tested to MIL-STD specifications to guarantee unrivalled protection in extreme conditions.
3. **Optimised Logistics:** Purpose-built external dimensions ensure efficient, seamless packing into standard Euro, industrial and 463L pallets.
4. **Secure 2" Press & Pull™ Latches:** Engineered for secure closure and effortless, fast access under pressure.
5. **Dual Automatic Pressure Equalisation Valves:** Rapidly balance interior pressure while keeping water and dust out of your protective solution.
6. **Interlocking Design:** Moulded top ribs and bottom stand-offs provide rock-solid stacking and stability during transport.
7. **Heavy-Duty Mobility:** Equipped with rugged, smooth-rolling wheels & heavy-duty rubber overmoulded handles for confident transport of heavy payloads.
8. **Integrated Card Holder:** Streamlined inventory management for professionals on the move.
9. **Made in the USA:** Quality construction built in the USA.
10. **Lifetime Warranty:** Our legendary guarantee of excellence (where applicable by law).

Euro Pallet

1200 × 800 mm

Fits standard 1200 × 800 mm Euro pallets, the backbone of road, rail and warehouse logistics across Europe. Interlocking moulded top ribs and bottom stand-offs keep stacked cases stable through forklift handling and transport, while lightweight HPX[A] construction reduces total load weight—so your equipment moves smoothly through commercial and defence supply chains.

Industrial Pallet

1200 × 1000 mm

Fits two cases per layer on standard 1200 × 1000 mm industrial pallets, common in European and international freight. The interlocking stack design keeps cases secure in storage and in transit, while lightweight HPX[A] construction lowers overall payload weight and supports efficient load planning and handling in warehouses and depots.

463L Pallet

2235 × 2743 mm

Engineered to align with 463L pallet dimensions, the 1726 Air optimises every square metre of airlift capacity. Its purpose-built footprint and interlocking stack design create stable, well-organised pallet loads, while lightweight HPX[A] construction lowers overall payload weight. When every kilogram and every position matters, the 1726 Air supports efficient load planning and handling from tarmac to forward position.

Built at scale. Customised for your programme.

Built on injection-moulded HPX[A] construction, the 1726 Air is faster and more scalable to produce than legacy rotomoulded cases—so Peli can meet high-volume, mission-critical demand without compromising on toughness. Whether you're outfitting a single unit or equipping a global deployment, our worldwide manufacturing footprint and supply chain ensure we deliver on any scale.

Custom foam configurations, colour programmes, branding and specialised interior solutions are available to meet your specific programme requirements.
